

A close-up photograph of the top of a Luci inflatable solar lantern. The lid is white with a clear plastic seal. The brand name 'Luci' is printed in a large, dark font, with 'by MPOWERD' in a smaller font below it. The website 'www.mpowerd.com' is also visible. The lantern is resting on a red surface with a circular pattern.

Luci is...

safe high quality bright light weight eco-friendly user-friendly durable waterproof powered by solar energy collapsible friendly affordable directional expandable childproof portable high quality

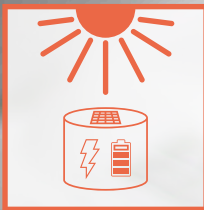

PRODUCT COMPONENTS

HOW TO CHARGE YOUR LUCI

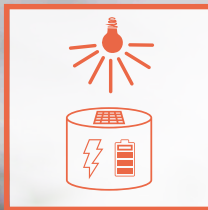

Luci can be charged in both direct sunlight and incandescent light. Turn Luci over, with the solar panel facing the sunlight, and let her soak in the light.

Sunlight

charging time
8 hours

Incandescent Light

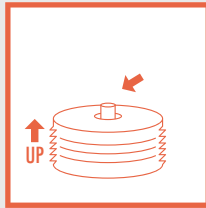

charging time
8 hours +

NOTE: this may vary due to environmental conditions and life of the lantern

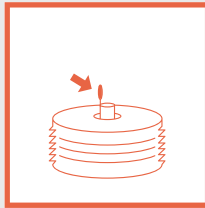

HOW TO INFLATE YOUR LUCI

Step 1

Make sure Luci is facing upward, with the valve on top and the solar panel on the bottom.

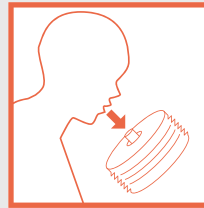

Step 2

Open the valve.

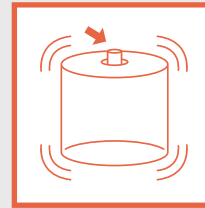

Step 3

Pinch the bottom of the valve and pull it up.

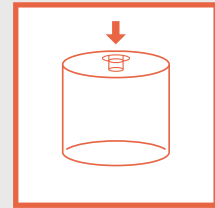

Step 4

Once fully pulled apart, bite on the valve and simultaneously blow into the valve until fully inflated.

Step 5

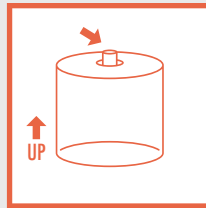

Close the valve.

Step 6 (optional)

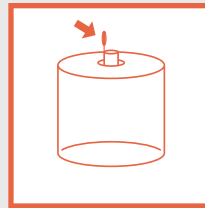

Push valve down.

HOW TO DEFLATE YOUR LUCI

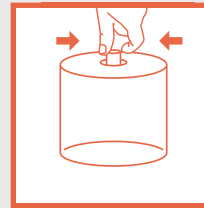

Step 1

Make sure Luci is facing upward, with the valve on top and the battery on the bottom.

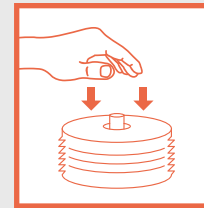

Step 2

Open the valve.

Step 3

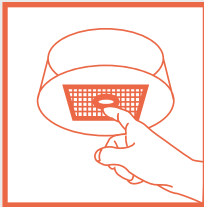

Squeeze the base of the valve.

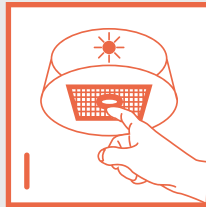

Step 4

Push down and watch Luci deflate.

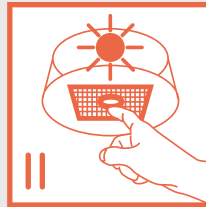

HOW YOUR LUCI WORKS

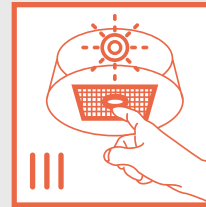

To turn your Luci on, press the ON/OFF button.

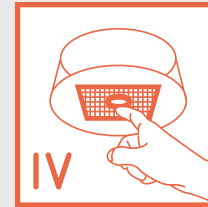

Press once for energy save and dim lighting.

Press twice for bright lighting.

Press three times for emergency flashing.

Press a fourth time to shut off.

LUCI CAN GO ANYWHERE!

INDOORS

Put Luci around the home to add a little extra light to any room. Partially deflate to provide a directional task light.

OUTDOORS

Let Luci make the night a little brighter by using her outdoors – on your patio, in a campground or even in a pool!

LUCI CAN SIT ANYWHERE!

Set Luci down anywhere you choose, without having to worry about her toppling over.

LUCI CAN HANG ANYWHERE!

Hang Luci up easily by her handle to let her glow from higher up.

HOME & INDOORS

Reading at night has never been easier than with Luci by your side! Slightly deflate Luci and turn her in any direction to use her as a directional reading light.

CAMPING & OUTDOORS

All of Luci's features make her perfect for camping. She is a safe and reliable alternative to matches, fuel and batteries. Bring Luci along on your next camping trip to see how useful she is!

POWER OUTAGE & CAR SAFETY

Luci is great to have around the house in case of a power outage or in your car in case of a breakdown. Let Luci be there for you when you need her most!

THE LUCI DOS AND DON'TS

DOS

Do recharge your Luci.

Do clean the body of your Luci with a damp cloth.

DON'TS

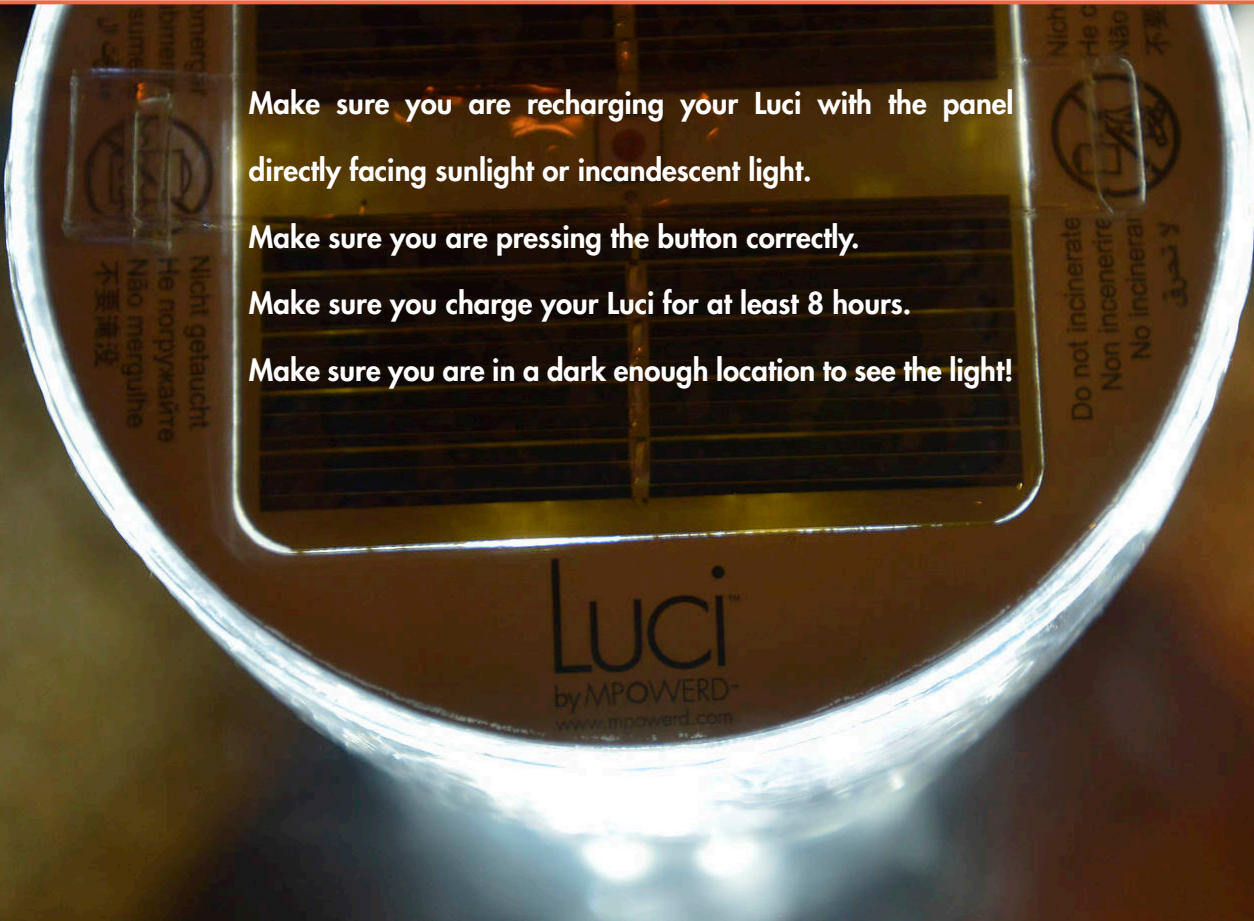

Don't keep Luci by flame.

Don't expose Luci to coarse substances that might scratch the surface like sand, dirt and mud.

Don't puncture.

Don't drink out of luci.

WHAT TO DO IF YOUR LUCI STOPS WORKING

Make sure you are recharging your Luci with the panel directly facing sunlight or incandescent light.

Make sure you are pressing the button correctly.

Make sure you charge your Luci for at least 8 hours.

Make sure you are in a dark enough location to see the light!

If your Luci is still not working, please look at the warranty information and mail us back your product within a year for a full exchange on any manufacturer defects. Your Luci comes with a 1-year warranty; we will be happy to exchange your item!

FREQUENTLY ASKED QUESTIONS

How many hours of lighting will I receive from one single charge?

When Luci is fully charged, you will receive 6 to 12 hours of light dependent on brightness level.

What is Luci's lifespan?

Luci has 300-500 cycles of full charge to full depletion so the length of time she lasts depends on frequency of use.

What happens when it's cloudy out?

If it is cloudy outside and you do not have access to incandescent light, Luci will charge, as long as it is not too cloudy and it is still daylight, but it will take longer.

What happens if I use Luci while it is raining?

Because Luci is waterproof, she will not be affected by rain and remember if its really rainy she floats!

How much area does Luci light up?

On her brightest setting, Luci can light up 15 square feet of area.

How long can Luci retain her charge when going unused?

Luci will retain 50% of her charge for 2 years if left inactive – i.e. she will only lose 2.5% of her charge per month.

Is it possible to charge Luci while in use?

Yes, but its preferable that you let Luci charge fully before using it.

THE MPOWERD VISION

Founded in 2012 as a Benefit Corporation, MPOWERD seeks to do well by doing good. We contribute to abolishing energy poverty through the development and manufacturing of innovative, affordable lighting and power products. Our goal is to provide access to bright light for everyone. We seek to provide viable options to supersede, replace and eliminate the environmentally unfriendly, dangerous and costly means by which people are presently forced to find light.

MPOWERD™

A group of children in school uniforms are gathered around a table, examining several clear plastic solar lanterns. The lanterns are illuminated from within, casting a warm glow. The children are looking at the lanterns with interest and curiosity. The background is dark, making the light from the lanterns stand out.

GIVE LUCI

MPOWERD is committed to empowering communities who are living without reliable energy access with clean lighting sources. Customers are encouraged to learn about how access to quality lighting can make a difference around the world and to give, so that LUCI can reach high-need communities at a discounted rate. These solar lanterns are solely distributed through our authorized NGO partners, who are working with us to help end energy poverty!
